Our old heating & air conditioning system couldn't keep all the rooms in our house comfortable - some rooms were too hot and others were too cold!

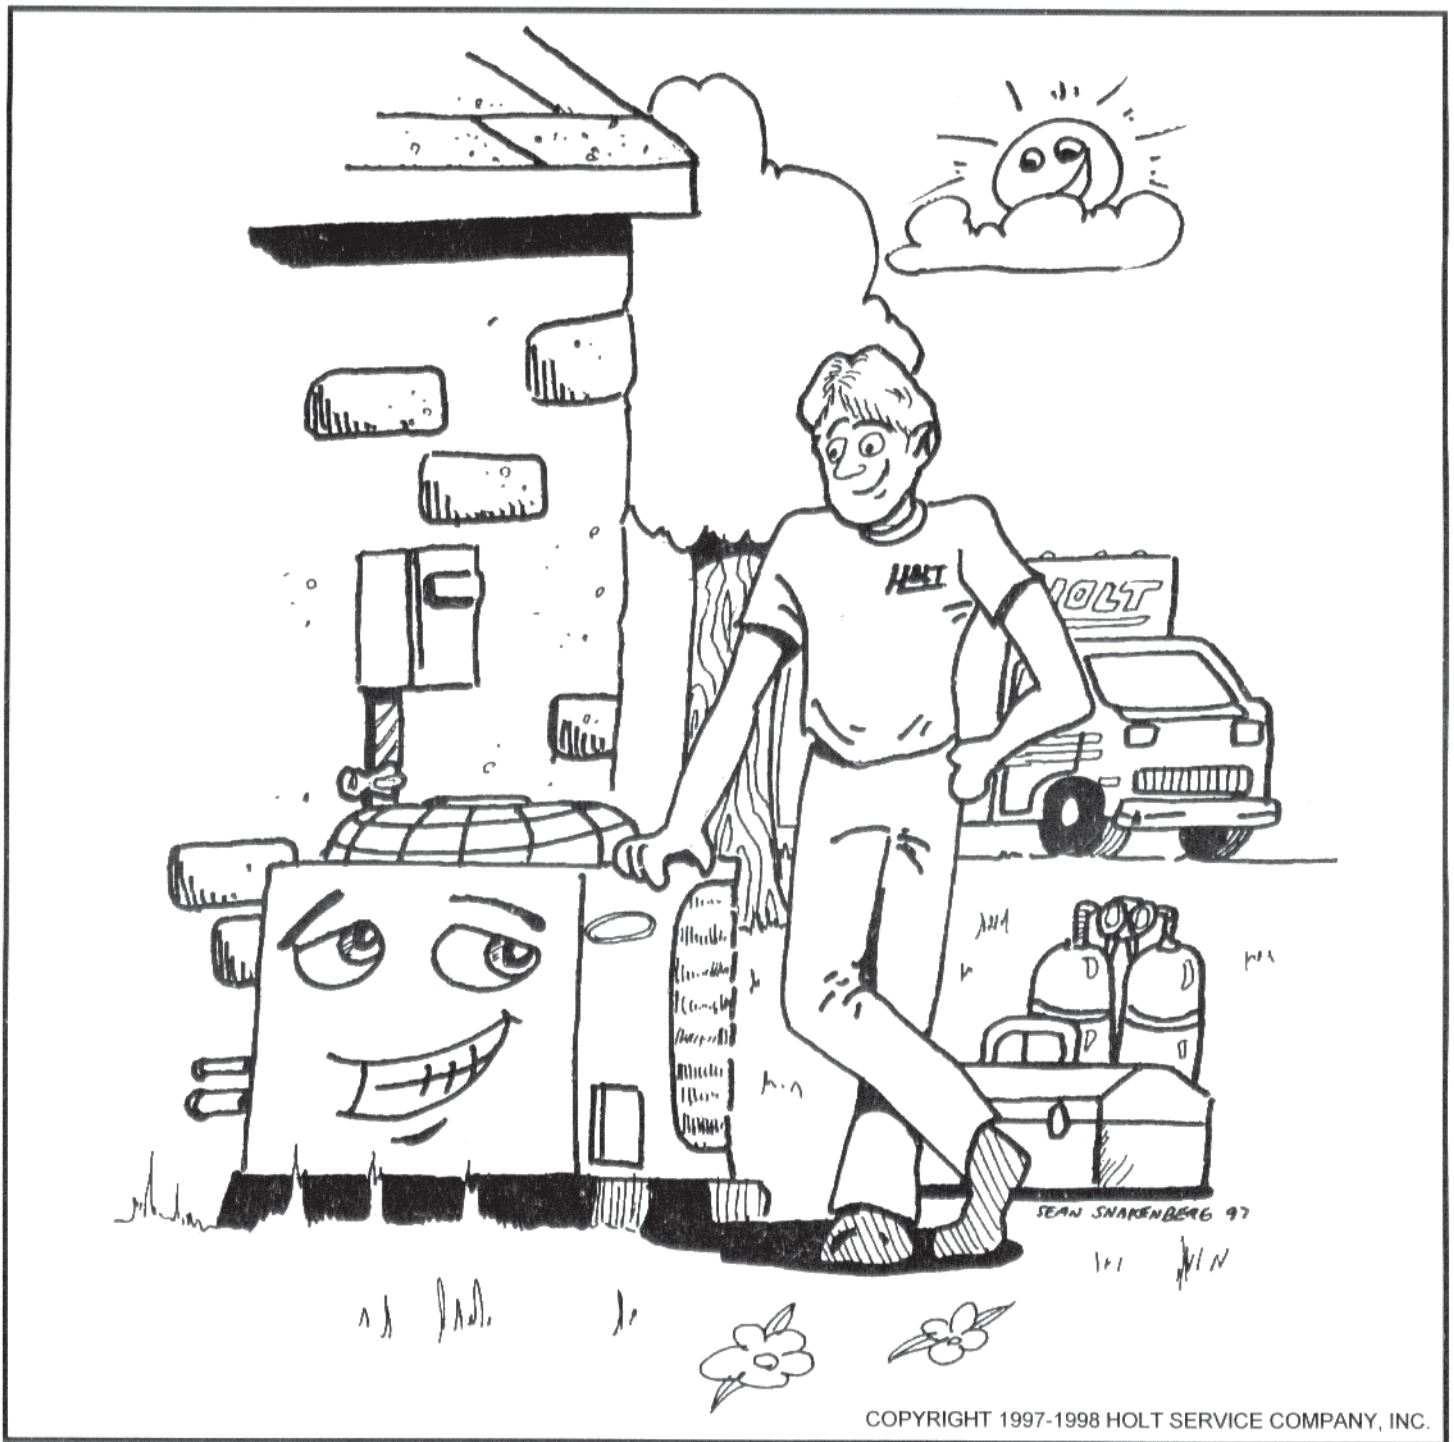

The old system used to blow dust, mold and mildew into the house. This really made it hard on our allergies and Mom had to dust the furniture almost every day! Yuk!

To make matters worse, Mom & Dad were paying huge utility bills every month! We didn't even have enough money left over to go to the movies once the utility bills were paid!

Our neighbors told Dad that Holt Service Company could solve our problems. Dad called 706-568-1520 and they sent a real smart person to check things out. He used some cool tools to see what was going on.

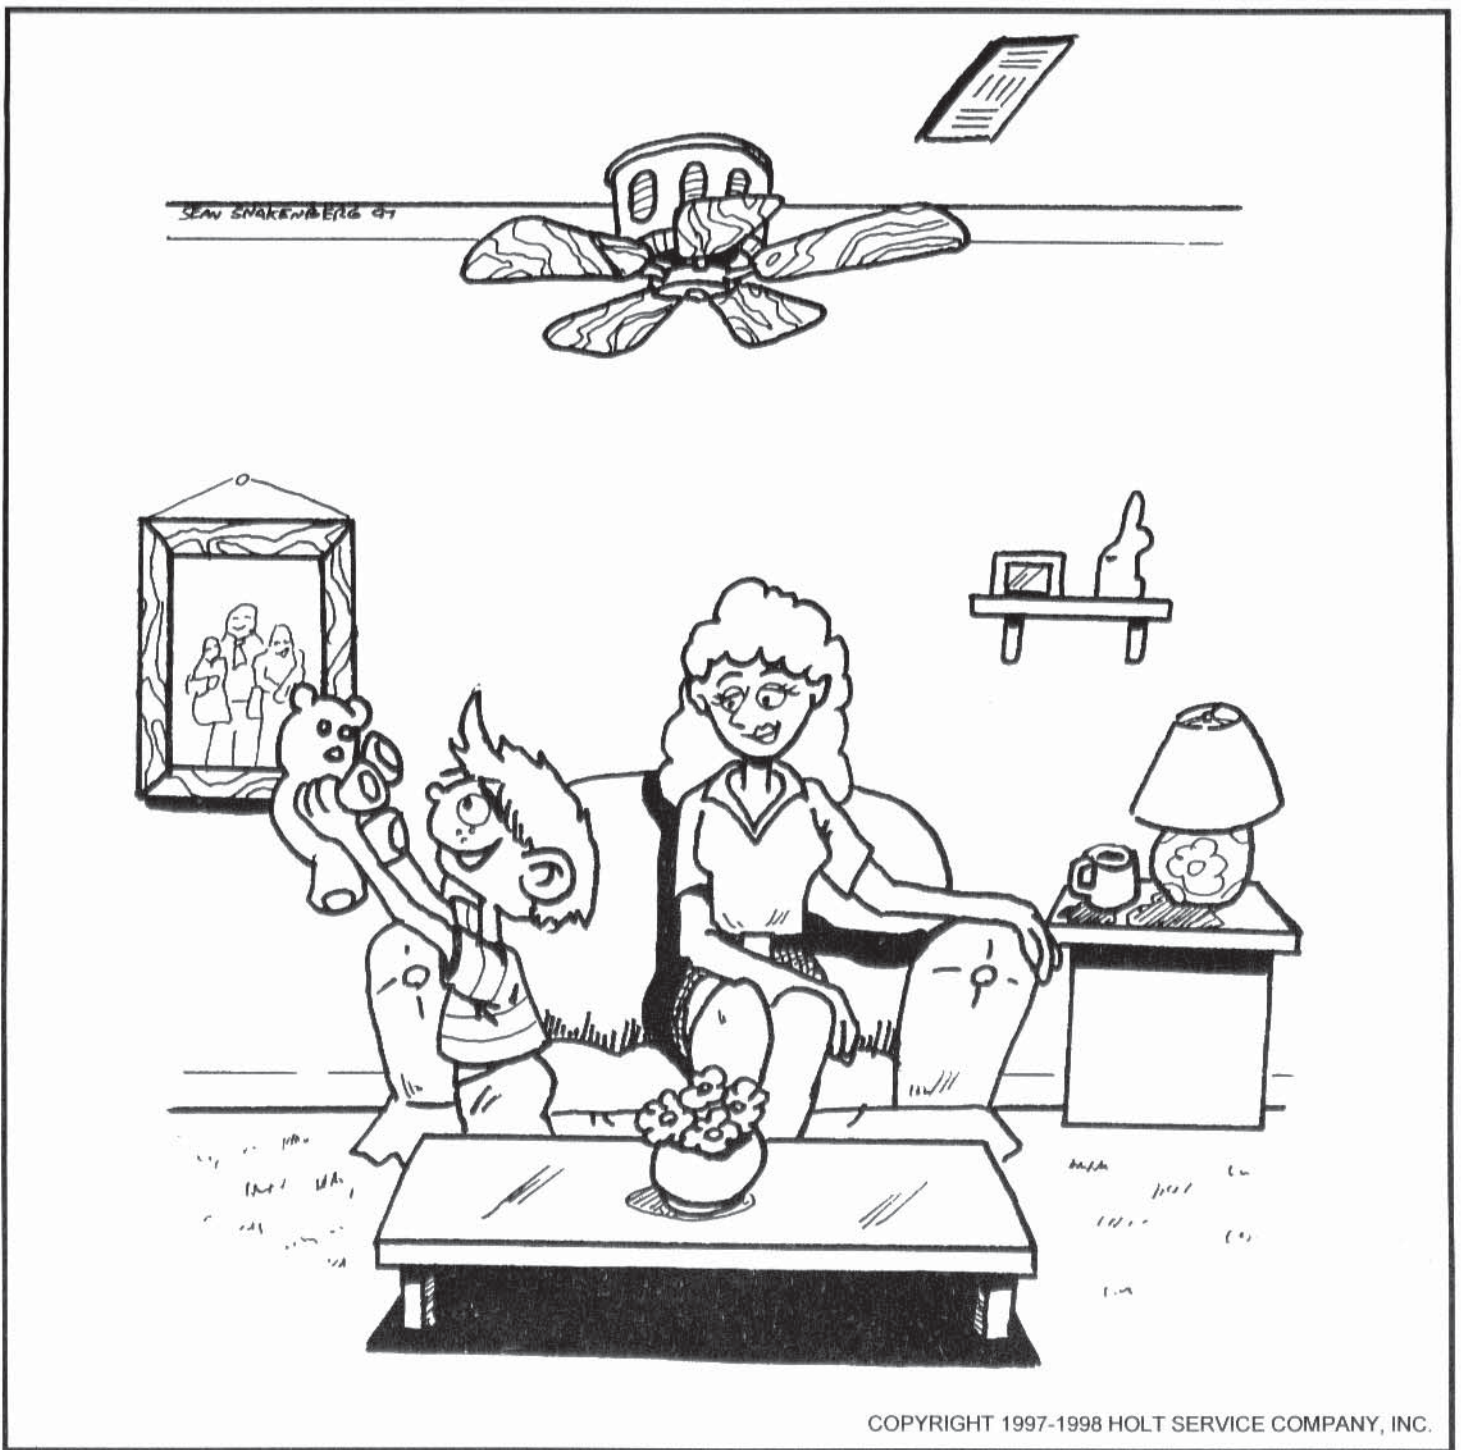

Holt recommended that we replace our old heating & air equipment with a new, high efficiency Carrier system with some pretty neat Honeywell enhancements. Our new system costs less to operate and it's a lot quieter, too!

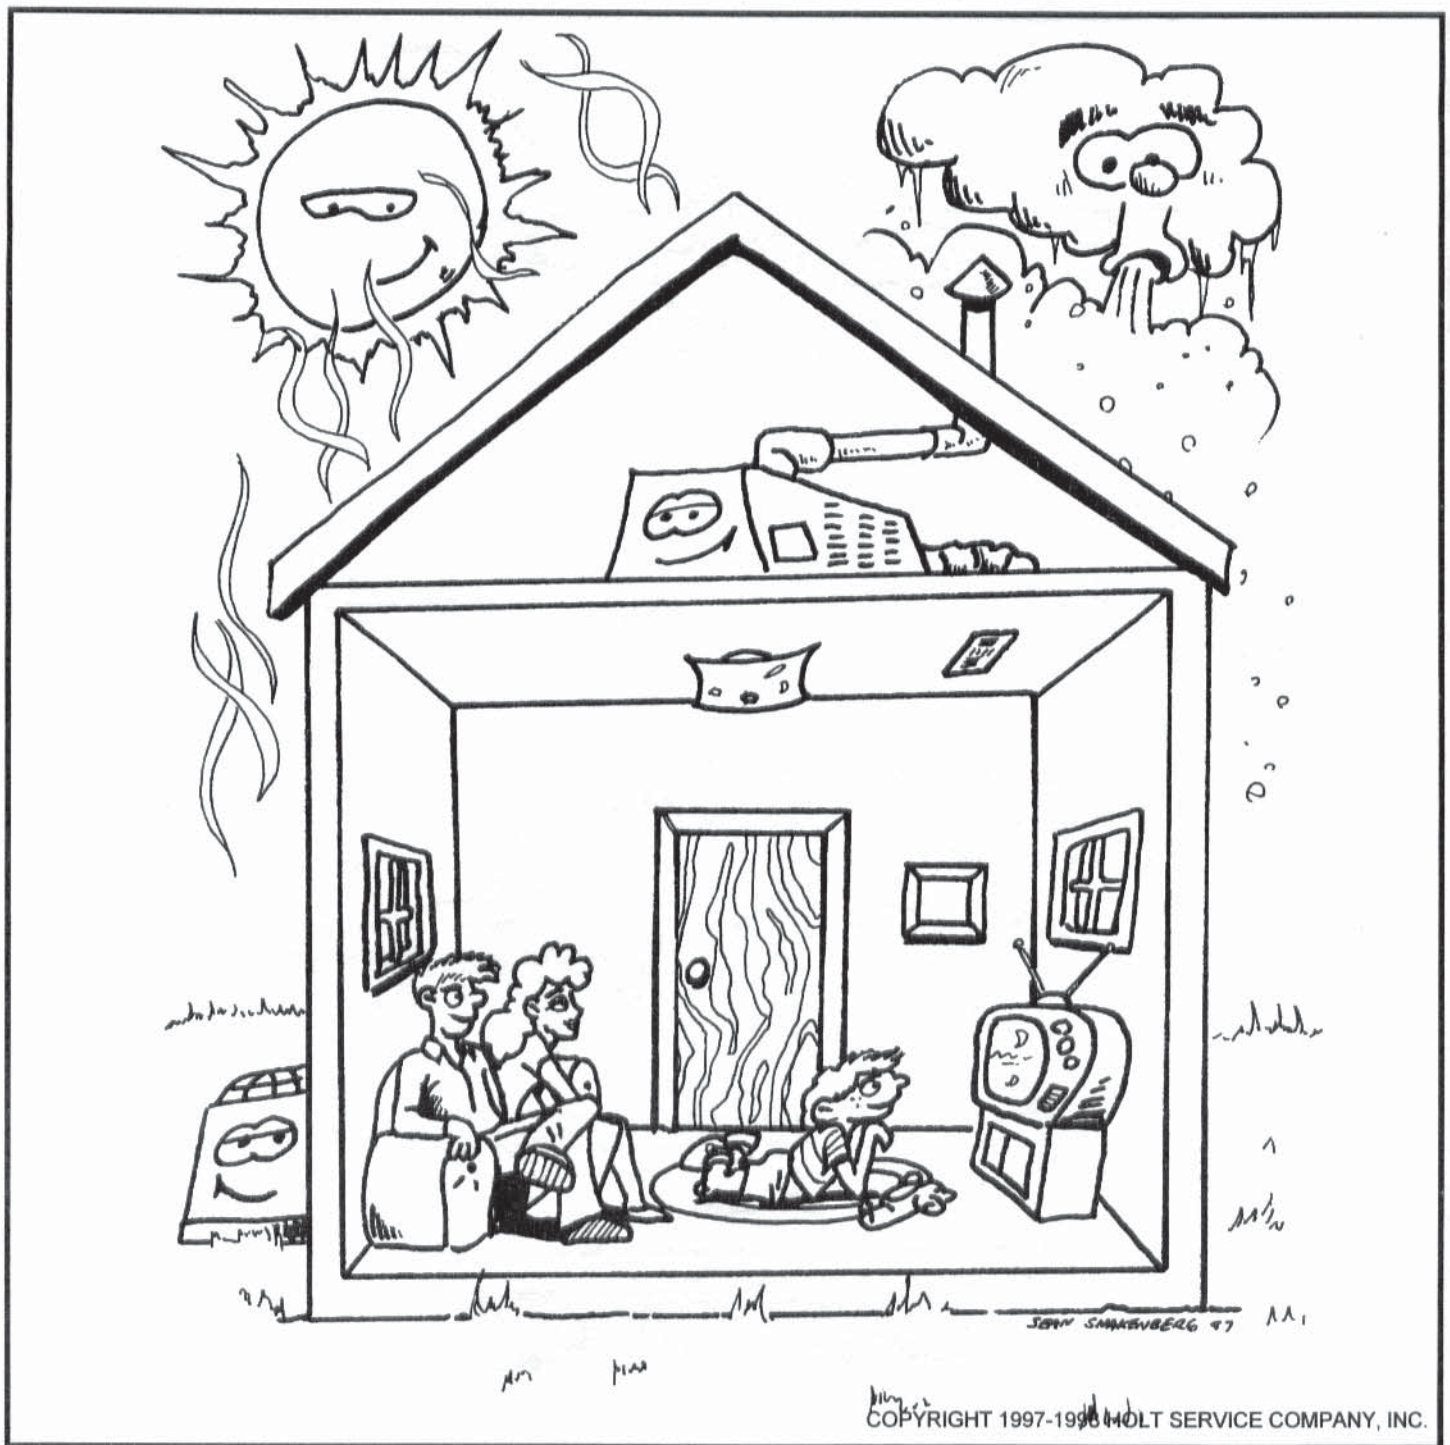

COPYRIGHT 1997-1998 HOLT SERVICE COMPANY, INC.

They even replaced our old air duct system with an engineered system that doesn't leak air. With a Honeywell Humidifier and Comfort Zoning System, each room in the house is as comfortable as it can be!

Now Mom doesn't have to dust the furniture every day and our allergy problems aren't as bad as they used to be thanks in part to our Honeywell Electronic Air Cleaner! Mom says our home is now a healthy home!

With our new Carrier & Honeywell system, it doesn't matter if its hot or cold outside, we're very comfortable with our Ultimate Indoor Comfort System from Holt Service Company.

Those Holt Service guys are my heroes! If you want to live in ultimate indoor comfort, just call 706-568-1520 and say "I want my own Ultimate Indoor Comfort System."
